

## SECTION 8:

### 8.1 - CLASS DESIGNATION: PRO LIMITED

### 8.2 - MINIMUM QUALIFYING ET: 9.99

The 2024 season introduces a new competition heads up class. In addition to Super Street Pro, Pro Limited will also be operating as heads up! As seen throughout the import drag racing world, the requirement for heads up racing, with a smaller turbo delivers the same highly competitive environment as seen in the highest ranks. Recognizing this, we too are making the changes to set racers up for their path of success to continue at CSCS, and then beyond. Although we have recently seen the class legal "64/70" turbo take the top seat in this "secondary" class, we are taking the necessary next step at providing a more balanced racing category, by pushing that turbo into Pro 8. Clearing the way for Pro Limited to be a very competitive power adder class with similar sized turbos, but with the goal of providing all setups a heads category to align with.

As seen in most heads up racing categories, this class will be limited by turbo, tire, and weight restrictions. Most importantly, and while continuing to parallel those pre existing guidelines, racers can take the next step in their development process of pushing their SFWD chassis closer to a XFWD chassis, FWD to AWD drive train, stepping up in turbo size, or similarly stepping up an existing RWD or AWD chassis to a more refined and efficient race setup. If heads up championship drag racing is your short term goal, while pushing your setup further into the pro rankings is a long term goal, this is the class where that journey continues.

Catch pan must cover entire area below the complete cooling/engine/transmission of the vehicle.  
Should a competitor spill excessive oil from the catch pan and debris onto the track, due to obvious negligence, they may be disqualified from further competition at the sole and absolute discretion of the CSCS tech.  
REPEAT OIL DOWNS WILL BE SUBJECT TO A \$500 CLEAN UP FEE. Contact CSCS for further information or details.*
